

# Flexible rondo collar

For situations with non-standard dimensions or high water pressure.

## Flexibele Rondo Collar

**Suitable for all types of plastic and metal pipes.**

RONDO sealing collars securely seal pipes and cables made of plastic, steel, fibre cement and vitrified. Clay against a water column of up to 100 m (10 bar). The bushings in concrete foundations and walls are securely sealed against groundwater and pressurised water.

The flexible clamps are made of EPDM rubber and are secured around the collapsible tube using stainless steel hose clamps.
