

Fiber cement pipes

Fibre cement cast-in pipe –
durable, watertight and reliable.

Fiber Cement Pipe

The FB pipe is made of special fiber cement and quartz sand. It is suitable for installation in walls and ceilings. It is waterproof and also suitable for use in drinking water systems.

Why a Fiber Cement Pipe

1. Excellent adhesion to the concrete
2. No leakage between concrete and poured pipe.
3. Available in many diameters.
4. Always remains nice and round and does not deform.
5. Available in any desired length up to 1200mm.

Type	Inside diameter	Outside diameter
FC Pipe 80	80	110
FC Pipe 100	100	130
FC Pipe 125	125	155
FC Pipe 150	150	180
FC Pipe 200	200	240
FC Pipe 250	250	290
FC Pipe 300	300	340
FC Pipe 350	350	402
FC Pipe 400	400	452
FC Pipe 450	450	502
FC Pipe 500	500	560
FC Pipe 600	600	670
FC Pipe 700	700	780
FC Pipe 800	800	880

**** Fiber Cement Pipes are available in any desired length up to 1200mm in length ****
 The Fiber Cement Pipes can be bonded to create longer lengths.

Fiber Cement Pipe split version

****The Fiber cement split pipe is available in any desired length up to 1200mm****

Plastic cover

When pouring fiber cement pipes, it's important to keep the inside of the pipe clean. Using plastic cover is a smart and simple solution.
